THE LOCKING SYSTEM WITH APP

CONNECT WITH THE MASTERKEY AND LOG IN

When launching the app for the first time, place the masterkey on the activation card and enter the supplied PUK code. Save this code for the future. Then, set your personal PIN. From now on, all settings will be saved in your masterkey.

ADD KEYS AND CYLINDERS

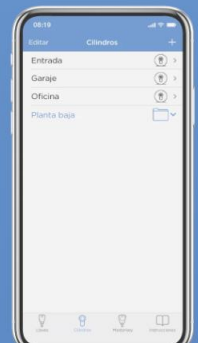

For custom settings, connect the masterkey to each key using the supplied adapter and add it to the system via the app. Then, connect the masterkey to the cylinders and readers on the door. Once everything is imported into the system, you're done!

CREATE KEY AND CYLINDER GROUPS

Optionally create your key and cylinder groups to have an overview of your BlueCompact system, which is particularly useful for small businesses and associations.

GRANT CLOSURE AUTHORIZATIONS AND GET AN OVERVIEW

Assign authorizations directly to each cylinder and reader by connecting the Masterkey and individually naming keys and cylinders. Useful group distribution, especially in keys.

**More security.
More flexibility.**

blueCompact convinces with its components **easy-to-use**:

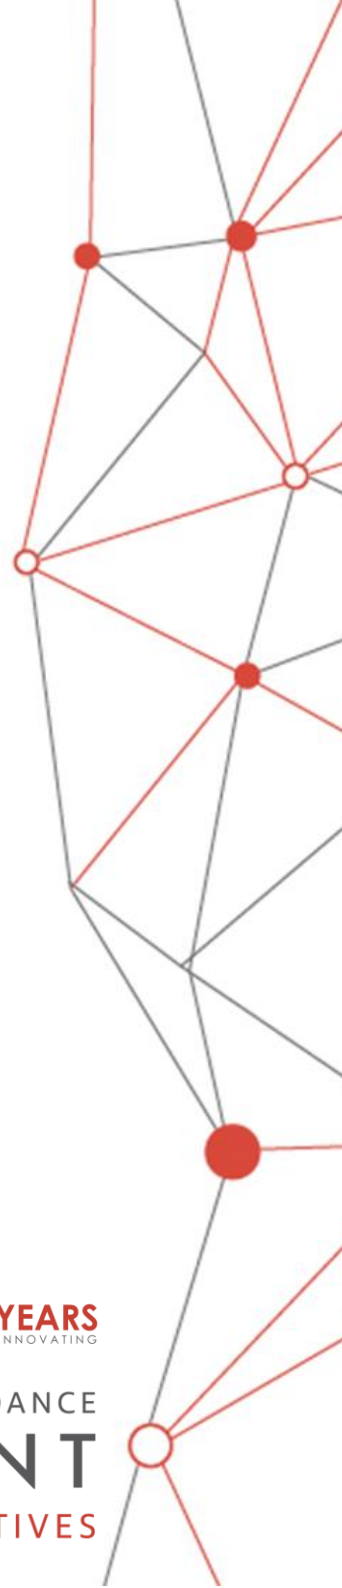

The cylinders are the same shape as conventional models, so they can be easily assembled without the need for an installer.

The flexible locking system can be expanded up to 100 keys and 25 cylinders or readers.
